

Oil Field Environmental Incident Summary

Incident: 20150728124224

Date/Time of Notice: 07/28/2015 12:42

Responsible Party: CONTINENTAL RESOURCES, INC.

Well Operator: CONTINENTAL RESOURCES, INC.

Well Name: HOLECEK 1-8

Field Name: MEDICINE POLE HILLS

Well File #: 4662

Date Incident: 7/27/2015

Time Incident: 13:00

Facility ID Number:

County: BOWMAN

Twp: 129

Rng: 104

Sec: 8

Qtr:

Location Description: Pasture adjacent to well site

Submitted By: Patrick Skillestad

Received By:

Contact Person: Patrick Skillestad
PO BOX 268870
OKLAHOMA CITY, OK 73126

General Land Use: Pasture

Affected Medium: Topsoil

Distance Nearest Occupied Building:

Distance Nearest Water Well:

Type of Incident: Other

Release Contained in Dike: No

Reported to NRC: No

	Spilled	Units	Recovered	Units	Followup	Units
Oil	0.5	Barrels	0.5	Barrels	0.5	barrels
Brine	0.5	Barrels	0.5	Barrels	0.5	barrels

Description of Other Released Contaminant:

Inspected:

Written Report Received: 9/14/2015

Clean Up Concluded: 7/28/2015

Risk Evaluation:

None

Areal Extent:

38 yards x 26 yards

Potential Environmental Impacts:

Topsoil in pasture

Action Taken or Planned:

Contaminated material was scraped up and stockpiled on well site. Will be disposed of later.

Wastes Disposal Location: Little Missouri Special

Agencies Involved:

Updates

Date: 7/28/2015 **Status:** Reviewed - Follow-up Required

Author: Suess, Bill

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Release left an E&P well pad and impacted an adjacent pasture. Follow-up is required.

Date: 8/6/2015 **Status:** Inspection

Author: O'Gorman, Brian

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Arrived on location at 14:30. 77 degrees F, P. Cloudy, West wind 15-30 mph. Observed site and took photos. The area inspected appeared in size as stated in the report. The area that had been scraped showed no signs of petroleum impacts. Adjacent to the scraped area, vegetation had been cut and removed with some residual remaining on the bottom of the plant structure. Natural attenuation should be acceptable to the remaining impacts compared to disturbing soils in the cut areas. A soil stockpile with the impacted soil was south of the tanks and still needs to be disposed of properly. Phone or email follow-up needed.

Date: 6/2/2016 **Status:** Inspection

Author: Suess, Bill

Updated Oil Volume:

Updated Salt Water Volume:

Updated Other Volume:

Updated Other Contaminant

Notes:

Visited the site on 4/25/16 at 1:39 p.m. Natural attenuation is progressing, and the area is beginning to revegetate. The soil stockpiles have been removed. More follow-up is needed to verify full revegetation and success of attenuation.
